## **DETAILED ACTION**

### ***Introduction***

1. Applicants' amendments and remarks filed on 1/22/2007 have been entered. Claim 11 has been amended. Claims 1-11 and 13 have been cancelled. New claims 15-22 are entered. Claims 12 and 14-22 are active.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. In response to the amendment, the grounds of rejection over prior art references JP 6107360A and US 4201698 have been withdrawn, because the amended claims are either new matter, or vague and indefinite. The withdrawn references are to be reinstated after the 112 issues are resolved, if appropriate.

### ***Claim Rejections - 35 USC § 112***

4. Claims 12 and 14-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

More particularly, new independent claim 15 recites

“An extrusion molded foamed cosmetic sponge puff having an intermediate cell structure in which closed cells partially communicate with each other, a water absorption of 5-500% and comprising a body comprising an NBR polymer, an organic peroxide, a

blowing agent and 1-100 parts by weight of a synthetic silicic acid, based on 100 parts by weight of the NBR polymer.”

The claimed invention is recited in the preamble recites as a foamed sponge puff, and the foam structure is recited as partially communicating closed cells having a water absorption property. However, the foam composition is recited as comprising raw materials of NBR polymer, organic peroxide (crosslinker), blowing agent, and silicic acid (wettability modifier or filler). Since the claimed article and structure are related to a foamed product, the recited composition of raw materials is clearly new matter, because it is unseen how the foamed product would have a composition of unfoamed raw materials.

5. Claims 12 and 14-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As set forth above, since the claimed article and structure are related to a foamed product, whereas the recited composition is raw materials, it is vague and indefinite what is being claimed.

### ***Response to Argument***

6. Since the prior art references have been withdrawn, applicants' arguments are moot.

### ***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
